Released 20<sup>th</sup> October 2007

## 1. UNPACKING YOUR LOUDSPEAKERS

**NOTE:** When lifting the loudspeakers out of the packing, hold them around the base. Do not lift them by the DDD driver support pillars (see figure 3) as this may damage the driver.

The DDD drives are protected with cardboard covers. We recommend that these be left in place until the loudspeakers have been placed in their final location so as to guard against accidental damage during handling.

The Troubadour 80 comprises two loudspeaker modules and two crossover modules. The two loudspeakers are packed in one carton and the two crossovers and interconnecting cables are packed in a second carton. Before opening the cartons, please inspect them for damage. If you see any damage to the cartons, please contact the supplying audio dealer immediately and provide them with a full description of the damage. Do not attempt to unpack the loudspeakers until you have spoken with the dealer and have been advised how to proceed.

Please retain all of the packing as you will need this should it be necessary in the future to ship the loudspeakers. Should you need to return the loudspeakers to the factory, you must use the original packing. The use of any other packing may result in the loudspeakers sustaining damage in transit. Such damage is not covered by the warranty. Should you require replacement packing, please contact your German Physiks dealer, the national distributor or the factory directly.

Use Figure 1 to identify the major components and confirm that the cartons contain the following items:

Item	Quantity	Description
1	2	Troubadour 80 loudspeakers
2	2	Troubadour 80 crossovers
3	2	Crossover cable
4	1	User manual

If any items are missing, or if any item shows signs of damage, please contact the supplying audio dealer immediately.

Figure 1. Troubadour 80 Major Components

There are two versions of the Troubadour 80. One is fitted with a titanium DDD driver and the other is fitted with a carbon fibre DDD driver. Each version has its own specific design of crossover. Please use figure 2 below to confirm that the correct version of the crossover has been supplied.
